EXPERIENCE

- Software Developer** Oct 2023 – Present
Advantive LLC – formerly PINpoint Information Systems Inc. *Toronto, ON, Canada*
 - Led the migration of legacy applications and services to **.NET 10** and SDK-style **.NET 8** architectures; authored **YAML CI/CD pipelines** and modernized a legacy reporting application to eliminate long-standing technical debt.
 - Designed and built a fault-tolerant **Windows background service** that validates and processes third-party files before submitting work orders through internal **REST APIs**, with file-lock retries and automated recovery.
 - Improved a critical data-processing workflow by approximately **80–90% in the desktop application** and **60–70% in the web application** by profiling a complex multi-component call path and eliminating previously unidentified performance bottlenecks.
 - Diagnosed and resolved a release-blocking **Entity Framework Core runtime failure** caused by compiler-generated LINQ behavior; identified affected queries across the codebase and delivered coordinated fixes across active release branches.
 - Remediated critical security vulnerabilities and architectural gaps in federated authentication flows, including **JWT token-refresh failures** and **cross-user session-isolation defects**; deprecated a legacy token validator and upgraded core **OIDC** dependencies.
 - Took end-to-end ownership of a centralized repository of customer-specific **.NET plugin assemblies**, standardizing dependency updates, testing, and release recompilation to improve maintenance reliability and support turnaround.
 - Resolved multiple critical post-upgrade production incidents involving **cross-application and multithreaded behavior**, delivering safe patches within **one business day** to reduce customer downtime and rollback risk.
 - Served as **Scrum Master** alongside full-time development responsibilities, maintaining **1.5–2 sprints of refined backlog**, improving urgent-work visibility, facilitating Agile ceremonies, and mentoring junior developers.
- Software Developer (Co-op)** Sep 2022 – Apr 2023
PINpoint Information Systems Inc. *Burlington, ON, Canada*
 - Built a multi-threaded **database replay tool** that improved testing **throughput** by **10X**, significantly reducing QA bottlenecks and strengthening core system scalability.
- Software Developer (Co-op)** May 2021 – Aug 2021
Digital 14 *Mississauga, ON, Canada*
 - Developed secure **Java-based backend services** for communication platforms while supporting enterprise-grade code reviews and **CI/CD** security adoption.
- Software Developer (Co-op)** Jan 2020 – Apr 2020
JSI Telecom *Kanata, ON, Canada*
 - Contributed to the **UI/UX** development of core product modules, collaborating within an **Agile** team to deliver iterative enhancements for enterprise clients.

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript, Java
Frameworks: .NET 8/10, ASP.NET Core, Angular, Entity Framework Core, WPF
Data: SQL Server, Stored Procedures, Query Optimization, Indexing
Tools: Azure DevOps, Git, PowerShell, Postman, Visual Studio, IIS
Engineering: REST APIs, OAuth 2.0, OpenID Connect, JWT, CI/CD, Multithreading, Performance Profiling, MVVM

EDUCATION

- University of Waterloo** Waterloo, ON
Bachelor of Computer Science – Co-operative Program (Honours) *Sept 2018 – Aug 2023*
 - Scholarships:** President's Scholarship of Distinction
